Sleep Medicine <sup>**</sup>	2007	1,753	1,288/1,603 (80%)			1,288/1,603 (80%)
Vascular Neurology	2005	2,264	1,881/2,116 (89%)			1,881/2,116 (89%)

- Notes:
1. The "All Certificates" columns reflect the total number of certificates issued, including diplomates known to be deceased and/or those whose certificates are no longer active.
  2. The 'Active/Total (%)' columns reflect the number of active (not expired or not revoked) certificates held by diplomates who were certified in their primary specialty in 1989 or later (assuming a 35-year career post initial primary specialty certification) and known not to be deceased.
  3. Joint board examinations administered by the ABPN are noted with a single asterisk (\*). The numbers in this table reflect ABPN diplomates only.
  4. Joint board examinations administered by another ABMS board are noted with a double asterisk (\*\*). The numbers in this table reflect ABPN diplomates only.
  5. \*\*\*The last Neuropsychiatry certificate was awarded by the ABPN in 1959.
  6. 'As of January 1, 2023, ABPN maintains the Continuing Certification (CC) program for all candidates who passed an assessment (initial certification or CC) in 2012 or later. CC status is contingent on a diplomate meeting all ABPN requirements of the CC program and, therefore, certification does not have an expiration date.

7. <sup>4</sup>The ABPN awarded non-time limited certificates for Psychiatry, Neurology, and Child Neurology through October 1994 and Child and Adolescent Psychiatry through December 1994. These certificates do not have an expiration date.

8. <sup>5</sup>In 2022, NDD certificates issued by the American Board of Pediatrics were transitioned to the ABPN for initial certification and continuing certification.
